

Product description

Powder-coated adhesive especially formulated for mounting GEOFLAM® and GEOTEC® boards. Also suitable for bonding various building materials: plasterboard, plasterboard tiles, aerated concrete block, etc. Can also be used for top coating on most substrates.

Composition and appearance

Gypsum, calcium carbonate, resin and various additives. White plaster.

Technical data

Reaction to fire A1 according to EN 13501-1
Operating time: approx. 2 hours depending on ambient conditions.

Average consumption

1 bag of glue = 10 to 20 m².

Drying time

5 to 6 hours depending on the ambient conditions.

Mixing rate

Approximately 12 to 14 L of water per 25 KG bag.

Permitted supports

Gypsum tiles, water-repellent or not / Gypsum / Cellular concrete.

Coating

All types of products except cement-based products.

Precautions for use

The temperature during application and drying must be between 5 and 30°C. Do not use paste that has begun to harden. Do not use outdoors.

Substrate preparation

The supports must be dry and free of dust.

Packaging

25 kg bags.

Transport and storage

Transport and store on a flat and protected surface (out of water), in a cool and dry place, protected from frost and heat.

Shelf life

6 months in original unopened packaging.
