

Expansion joint element GEOTEC® A / GEOFLAM®

FIRE RESISTANT ACCESSORIES

Ventilation

Smoke extraction

Fire protection services

Fire-protection up to 2 hours

Silicate-free plaster-based product

EI 30 - 60 (S) / EI 90 - 120 (S)
30 to 120 minutes fire-resistant

Application in a horizontal duct

Application in a vertical duct

- 1 GEOTEC® or GEOFLAM® duct
- 2 Fire resistant silicone
- 3 Intumescent seal
- 4 Foam seal
- 5 Wood screws VBA Ø 5 (GEOTEC® duct only)
- 6 GEOCOL® glue
- 7 Expansion joint element
- 8 Bead Ø 40 mm

In the case of a GEOFLAM® duct, use fiber reinforced gypsum instead of wood screws.

FIRE-RESISTANT ACCESSORIES

The expansion joint elements are pre-moulded gypsum and fibreglass elements of 1.50 ml, glued to the perimeter of the ducts and used as a presser for the insertion of foam and intumescent joints, in order to take up the various movements of the construction.

Advantages

- ✓ Silicate-free product
- ✓ Possible application of water-based acrylic paint
- ✓ Easy cutting with a circular saw, sabre saw or handsaw
- ✓ Possible application of a water-repellent treatment that does not modify the fire resistance performance

✓ Element sold in kit including :

- 1- Plaster press (Length 1,50 ml)
- 2- Intumescent seal (40 x 4 mm - Length 1,50 ml)
- 3- Foam gasket (50 x 40 mm - Length 1,50 ml)
- 4- Silicone cartridge (3 ml)

Installations

Glue GEOCOL® + screws

Mixture of GEOPLÂTRE® N and sisal fiber

Applications

- For installation on GEOTEC® or GEOFLAM® ducts in line with the expansion joints of concrete structures.

Dimensions

| Thickness (mm) | EI (mm) | Length (m) | Width (mm) |
|-------------------|------------|---------------|---------------|
| 60 | 30 to 120 | 1,5 | 200 |

E = Flame and hot gas tightness

I = Thermal insulation

The data in this table are average values, given for information only. If certain properties are essential for some particular application, we should preferably be consulted.

Transport and storage

Transport and store on a flat, protected surface (out of water).

Classification and tests

✓ Certified according to the fire resistance test standards:

EN 1366-1

EN 1366-5

EN 1366-8

✓ Certified according to the fire resistance classification standards:

EN 13501-2

EN 13501-3

EN 13501-4
